

Thanks for helping me clean up after the storm!

No problem! What do you think I should do about this cut, though?

Let's clean and dress it properly, then call your doctor to see if you should get a **tetanus shot.**

Doctor's office

Local pharmacies

Clinics

Health centers

Where can I get a tetanus vaccine?

Tetanus safety during storm cleanup

- **Before cleanup**, get a tetanus shot if it has been over 10 years since your last one.
- **If you get a minor cut or scrape** get a booster if your last tetanus shot was 5+ years ago.
- **If you get a serious injury** (deep punctures, dirty wounds, wounds requiring stitches, etc.) see a medical provider immediately.
